Code SAVPPE003
R935.00 each + vat

The Hands-Free Sanitizer is the most safe and effective way to ensure that the public have safe access to hand sanitizer. Studies showed that contamination of hand-contact surfaces could act as a reservoir for microorganisms and could contribute to hand contamination before or after hand sanitation. The provision of a hands-free solution increases the public uptake and use of hand sanitizer by massive increments. Public hand hygiene is an opportunity to further improve Covid-19 safety in public spaces.

Protect the Public from Exposure to Infection and Disease.
